

**Product Features And Benefits:**  
**Micro AIROMA® Dispenser and Aerosol Refills**

\*\* Patented Features

<b>DISPENSER FEATURE</b>	<b>BENEFIT IN USE</b>
Countdown to next spray**	Provides visual warning next spray time, preventing Service personnel being sprayed in the eyes / face
Large LCD Screen	Provides easy to read verification of Dispenser operation, including visual refill alerts.
Real Time Programme	Allows user to set a start time, hours of operation and days of operation, therefore maximising on hours of operation and conserving refill life for the hours the business is open.
Intensity Plus Event Timer – IPE® feature **	Allows three pre-set times when the dispenser will spray three times in rapid succession. This feature provide more fragrance to be delivered at busy times in the location.
Unique lens system	Each dispenser contains a unique lens and lens backing component, which facilitates Private Branding, corporate identity as well as point of use messaging or advertising.
“Easy” or “Rent” button	If full programmability is not required the user may select the “Rent” button for quick and easy programming. This feature allows 30, 45, or 60 days. No alarm features are activated whilst in use – specifically good for service providers.
Economic Battery Usage	The dispenser uses “C” cell batteries. Battery life is up to 3 years (dependent on conditions) and “C” cells are generally a lot cheaper than “D” cells. This reduces cost in use.
Programme verification	For programme setting verification the user can press and hold the programme button for 4 seconds to confirm all programmed settings. This is of benefit to installers to verify operation times.
Automatic re-set switch**	On replacement of a fragrance refill an automatic re-set switch recognises when there is no refill present. On re-fitting the refill the auto re-set switch re-sets the programme to the existing setting.
Key – Locked dispenser cabinet	The same key operates all dispensers in our “Family Affair” range. The lock feature prevents theft of refills.
Refill Empty Alerts	The LCD screen displays the life of a refill. This will automatically countdown dependant on days of operation and time settings.

Choice of refill options	A choice of over 14 high quality fragrance refills available with 3000 metered sprays per can
Test Button	To verify operation of the aerosol with a 5 second countdown alert before spraying.
Cabinet hinge operation	The cabinet hinges upwards and not down, which makes the replacement of refills easier, safer and more accurate
