

FLIES SPREAD DISEASE AND SUFFERING... ...CONTROL THEM WITH PESTWEST

Consider this...

If a cockroach were to walk across your table at a restaurant, you would leave immediately. However, if a fly were to land on your plate, you would probably just wave it away and carry on eating. Yet, the fly carries as much disease potential as a cockroach. Should it not be met with the same distaste and controlled with as much vigilance?

Flying insects have been found to carry a wide range of dangerous microorganisms all over their bodies, in their saliva and excreta, including *E.coli*, *Salmonella*, *Klebsiella*, *Campylobacter* and many others. Even a tiny dose of any of these is enough to cause serious disease. At the very least, insect contamination reduces product quality, making it unsaleable – it is here that “a fly in the soup” is no joke.

PROFESSIONAL ELECTRONIC FLY KILLERS

- Unique transformer - minimises shattering of insects.
- Hands-free guard opening - for easy service.
- 'Power on' and 'grid on' warning lights - inspection at a distance.
- Catch tray with draught deflector - keeps dead insects in tray.
- Spring-loaded killing grid - easy cleaning.
- Wrap around guard - 360 degree protection.
- Quantum BL shatterproof UV tubes - maximum attraction.
- Choice of mounting option for ease of placement.
- Available in white or stainless steel finish.

>> Nemesis[®] Ultima 80

Ideal for food manufacturing, processing and packaging factories. Two 40-watt Quantum BL tubes coated in Teflon[®] G shatter-resistant resin gives coverage over 480m².

Height: 43.2cm Width: 68cm Depth: 15.7cm Weight: 10kg
Ceiling-suspended/Freestanding: 480m² Wall-mounted: 240m²

>> Nemesis[®] Ultima 45

Compact and high powered, ideal for use in food processing areas, shops and kitchens. Features three 15-watt 18" long Quantum BL UV tubes coated in Teflon[®] G shatter-resistant resin for protection over 280m².

Height: 43.2cm Width: 52.8cm Depth: 15.7cm Weight: 9kg
Ceiling-suspended/Freestanding: 280m² Wall-mounted: 140m²

>> Nemesis[®] Ultima 22

Ideal for areas such as kitchens, shops and food processing areas. Robust and compact. 22-watt circline Quantum BL shatterproof UV tube covers areas over 140m².

Height: 43.2cm Width: 35.2cm Depth: 15.7cm Weight: 6.8kg
Ceiling-suspended/Freestanding: 140m² Wall-mounted: 70m²

FLY CONTROL
FOR THE MOST EXACTING
STANDARDS IN THE
FOOD INDUSTRY.**

COMMERCIAL RANGE

Even in the smallest premises, fly control is a must, as the same regulations and requirements apply. PestWest has developed a range of units for smaller premises and shops and even for domestic use, especially for you. Even at the lower end of the price range, we ensure that you still have as effective a unit as possible - and some additional design features mean that the commercial range stands head and shoulders above the rest.

>> Titan 70

A basic, no-nonsense EFK unit with a highly durable, all metal chassis for small commercial premises, offering two powerful Quantum BL 15-watt tubes, giving protection over 180m².

Height: 32.5cm Width: 47cm Depth: 11.5cm Weight: 5.6kg

>> Titan ALPHA

A very powerful, yet compact machine with two powerful 15-watt tubes giving coverage over 160m². Ideal for shops, kitchens, cafés and take-aways.

Height: 30.5cm Width: 35cm Depth: 15cm Weight: 4kg
Ceiling-suspended/Freestanding: 160m² Wall-mounted: 80m²

>> SUNDEW FLY LITE

As with the fly-catching plant from which it takes its name, the SunDew Fly Lite is attractive, discreet and environmentally friendly but no refuge for flying insects.

A uniquely attractive sticky trap unit that has found an ideal home in cafés, bars, restaurants, offices and even in the home. A compact unit with low power consumption for small areas or front-of-house where extra discretion is preferred; the SunDew Fly Lite can be wall-mounted or just placed on a table or worktop.

Choice of front cover; stainless steel with eye catching bubble cut-out design or white front cover with attractive glow.

Height: 30cm Width: 25.5cm Depth: 10cm Weight: 2.5kg
Freestanding/Wall-mounted: 30m²

PROFESSIONAL STICKY TRAPS

- Quantum BL shatter-resistant tubes coated in Teflon® G resin for maximum attraction and reduced risk of contamination from glass breakages.
- Full-size sticky board to effectively catch even the smallest flies.
- Easy to remove bottom tray, drop-down guard and front covers - no tool service.
- Reflectobakt® sleeves increase attractiveness to insects, significantly slow the drying of the sticky board and allow longer board life and slimmer design.*
- Interchangeable tubes and sticky boards on all units to minimise stocking requirements (except Chameleon 4x4).

>> Chameleon 1x2™

Attractive, ultra-slim, wall-mounted unit (freestanding bracket available), compact and unobtrusive, ideal for use in food preparation areas. Two 15-watt powerful Quantum BL shatterproof tubes give 180° coverage.

Available in white or stainless steel.

Height: 31.5cm Width: 48.5cm Depth: 6.5cm Weight: 4.3kg
Wall-mounted/Freestanding: 90m²

>> Chameleon 2x2™

Ceiling-suspended; able to protect large open areas. Can be placed above aisles with no possibility of fly fallout. 360° attraction with four 15-watt Quantum BL shatterproof tubes and two full-size sticky boards.

Available in white or stainless steel.

Height: 31.5cm Width: 48.5cm Depth: 12.5cm Weight: 6kg
Ceiling-suspended: 180m²

>> Chameleon™ Uplight

Attractive, wall-mounted unit; the perfect choice for areas where fly control should be discreet, e.g. restaurants and other eating areas. Disguised as a wall light with full-size sticky board and 15-watt Quantum BL shatterproof tube hidden from view. Front cover can be decorated to match existing décor.

Height: 20cm Width: 47cm Depth: 22cm Weight: 3.6kg
Wall-mounted: 40m²

>> Chameleon 4x4™

Large capacity sticky trap unit for open industrial areas. Ceiling-suspended with four 40-watt Quantum BL tubes with Teflon® G shatter resistant coating backed by Reflectobakt® sleeves to protect over 440m². Advanced electronic ballast for lower running costs.

Height: 61.5cm Width: 63.5cm Depth: 16.5cm Weight: 11.75kg
Ceiling-suspended/Freestanding: 440m²

SPECIALIST RANGE

>> Nemesis®

Large Fabricated from polished marine grade 316 stainless steel with stainless steel grids and guards and hard-wired circuitry, this model is splash-proof, draught-proof and IP44 rated. Two 40-watt Quantum BL tubes with Teflon® G shatter-resistant coating offer protection over 480m². Used effectively in meat processing plants, abattoirs, dairies and farms, across Europe and the USA.

Height: 44.5cm Width: 67cm Depth: 20.5cm Weight: 12.7kg
Ceiling-suspended/Freestanding: 480m² Wall-mounted: 240m²

- Unique transformer - reduces shattering of insects.
- 'Power on' and 'grid on' warning lights - inspection at a distance.
- Catch tray with draught deflector - keeps insects in machine.
- Spring-loaded killing grid - easy cleaning.
- Quantum BL shatter-resistant tubes coated with Teflon® G resin for maximum attraction and significantly reduced risk of contamination from glass breakages.
- Choice of mounting option for ease of placement.

PestWest™
FLYING INSECT SCIENCE

* Except Chameleon Uplight

The established leader in the field of flying insect control with an impressive worldwide reputation, PestWest manufactures highly effective and reliable electronic fly killers and sticky trap units.

As part of the Killgerm Group, which specialises in supplying professional products to the pest management industry, PestWest units are designed to the most exacting standards. With a depth of knowledge gained over many years, you can be confident that, when you come to PestWest and our Australian agent Pest IT Pty. Ltd. for advice, training and products, you will be getting the best.

Also with PestWest, one factor that you no longer need to worry about is quality. All PestWest units carry the CE mark and the Australian 'C-Tick' mark and comply with internationally accepted safety standards.

Units available in Australia are independently tested for compliance with EN 60335-2-59 Safety Standard for Electronic Fly Killers. All units are designed to be serviced without the need for tools, saving time and money. They are built to the highest specification for long life and efficiency, carrying a 3-year guarantee.

The company is the proud holder of the Queen's Award for Enterprise 2004, the holder of regional and national awards for export sales, is the winner of the UK award for Best Use of Education and Training and prides itself on manufacturing high quality, reliable and effective units utilising innovative and unique design features.

All fly control equipment needs regular servicing if it is to remain effective. Whilst the initial cost may be important, consider maintenance and running costs too. PestWest can lead you through the steps you need to follow in selecting a unit and indicate which units may suit your situation.

Altogether superior quality for people serious about reducing the risks to their customers' health.

To maintain maximum efficiency UV tubes should be replaced ideally every 6 months but at least every 12 months.
