

PY-ZAPP will control, eliminate and repel flying and crawling insects

Py-Zapp Metered Insecticide is made in Australia with natural Australian pyrethrum, derived from plant extracts grown in Tasmania (Chrysanthemum flower).

Py-Zapp is ideal for use in the home, warehouse, office, storage area, food facility or retail environments.

Py-Zapp is effective against a wide variety of flying and crawling insect pests such as moths, wasps, ants, mosquitoes, flies, silverfish and cockroaches to name but a few.

Py-Zapp Metered Insecticide aerosol 150g contains 5000 activations.

Py-Zapp contains no chlorofluorocarbons, is non-allergenic, non toxic and harmless to human and pets.

HOW TO USE

Use the Py-Zapp Natural Pyrethrum Metered Insecticide in an automatic aerosol dispenser.

Insect activity can be affected by air changes, general layout, temperature, humidity and other factors.

For effective day and night operations, it may be necessary to adjust settings for local conditions.

TO KILL MOST FLYING INSECTS

1. Dispenser should be installed a minimum of two meters above the floor, preferably with a clear area between the floor and the dispenser.
2. Open and place Py-Zapp can in dispenser.
3. Program (adjust settings) with instructions supplied with dispenser. Turn on.

EFFECTIVE AREA: 170m³
