

**DISINFECTANT / SANITISER / CLEANSER FOR INSECT FEEDING & BREEDING SITES**

### **DOING IT BETTER – NATURALLY!**

A pure synergistic blend of 100% natural essential oils. A new safe and natural replacement for synthetic insecticides and germicides by cleaning the insect feeding material and breeding sites.

AQUA NAMA is unique:

- Contains no synthetic insecticides
- Neutral - contains no caustic - no solvents - no soaps
- Harmless to paint, fabrics and glass. Can be used on any hard surface
- Cleans, deodorises and disinfects all hard surface areas
- A potent germ killer
- Mild enough to be used without harming hands or other skin areas
- Harmless to humans and other warm blooded animals
- Contains no quaternary ammonium compounds
- AQIS approved for use on food preparation surfaces

Apply concentrate mixed with water 20:1 to the feeding source and harbourage of flies and cockroaches, such as drains, floors, behind kitchen equipment, food preparation areas, basements, under benches to name a few.

Used daily, AQUA NAMA will destroy the micro organisms causing the development of foul odours. Will also repel insects pests such as flies and cockroaches.

Ideal for use in:

- Food preparation areas • Kitchens
- Grease traps • Garbage areas and dump bins
- Washrooms • Refuse trucks
- Sludge beds • Drains

### **APPLICATIONS AND USES**

As a disinfectant use at a dilution rate of 1 part AQUA NAMA to 20 parts water.

To manage the breeding sites of flying and crawling insects apply to all hard surfaces, grease traps and garbage bins at a dilution rate of 1 part AQUA NAMA to 20 parts water. Apply as a spray,

For hard to access areas such as oven hinges spray at a dilution rate of 1 part AQUA NAMA to 10 parts water.

Note: For best results all areas should be thoroughly doused with Aqua Nama solution and left before hosing down.
