

Reclaim your outdoor lifestyle from Mosquitoes and Midge

...with the Mosquito SlayerPRO

The Mosquito SlayerPRO mimics the human body in order to lure, catch and kill the female mosquito – the one that bites and spreads serious disease.

Attractants include carbon dioxide (CO₂), heat, moisture, food grade lure blends and various light wavelengths.

Environmentally friendly to use in residential and commercial applications, schools, sporting facilities, hotels, resorts, cafes, hospitals, stables, mines, research and surveillance.

features
