

SOLAR POWER SPECIFICATIONS

Both the Mosquito SlayerPRO and the Mosquito Slayer Series 4 can run off either AC or DC power supply. This means solar power can be employed where mains power is unavailable or undesirable. Installers need to source their own solar systems. Follow the specifications below to configure a suitable solar system.

Specifications

1. Minimum of a 20 watt panel.
2. Rechargeable 32 APH battery. We recommend a lead acid battery as it is more cost effective.
3. An outdoor regulator with peak current of 3amps. Standard features include:
 - 3.1 Over discharge/charge protection.
 - 3.2 Reverse charge protection.
 - 3.3 Over load protection.
 - 3.4 Temperature stable.
