

AvePro Huntsman

Durable materials

Design for Australian climate

Easy to install

Improved installation time

Totally humane

Low maintenance

Available in two sizes

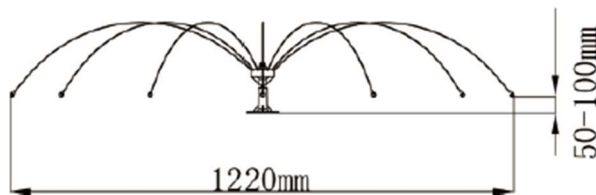

Easy attachment options

Suitable for Large pest birds

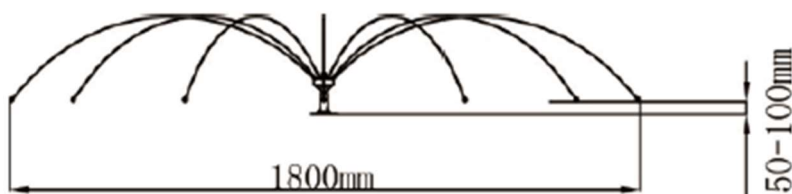

AvePro Huntsman is a spider-like physical deterrent, suited to larger pest bird species such as pigeons, ravens and sea gulls. The stainless-steel tentacles rotate in the wind adding to the menacing view from a birds perspective. The rotating base can be attached directly to a building or attached to a Perspex (or similar) base for gluing.

The AvePro Huntsman is ideal for deterring pigeons and larger birds from air conditioners, platforms, roof areas, street lights, chimneys, and the like.

Available in two sizes – 1.2m and 1.8m

AvePro Huntsman 1.2m

AvePro Huntsman 1.8m

AvePro Huntsman Accessories:

AvePro Huntsman Boat Base
